

Kit Contents

- 1x Pet Bowl
- 1x Float Valve
- 1x Cover
- 1x Hoselink Accessory Connector

ASSEMBLY

1. Open box and remove parts from inside bowl. Give the bowl a clean with soap and water.
2. Screw the Hoselink Accessory Connector into the float valve.
3. Attach the cover to the bowl. Make sure the PET bottle hole is facing to the middle of the bowl. The four clips on the lid will match up with holes on the bowl. The clips can be pressed into position.

CONNECTING WATER SUPPLY

(Note: For help with connecting Hoselink to your garden hose please see Hoselink Fitting Instructions.)

1. Fill the pet bowl with water directly from the hose to about 2cm from the rim. This will save time.
2. Once filled, attach the Hoselink hose to the pet bowl and place the bowl on a flat horizontal surface.
3. Turn the tap on to start filling. **Note: The bowl only requires very low water pressure to operate. Only turn tap on lightly.**

USE WITH P.E.T. DRINK BOTTLE

1. Fill pet bowl to 2cm from the rim.
2. Fill P.E.T. bottle with water. Tip the bottle upside down and screw into the PET hole. For this step make sure you are in an area that can get wet.
3. The P.E.T. bottle will empty until it reaches the fill line. The water will then dispense out of the P.E.T. bottle whenever your pet drinks from the bowl.
